

## LSR-330/20 - Power Resistor

5%

High-power cement resistor, 33 Ohm, 20 W

Resistor for use in crossover networks, especially for PA and top hi-fi applications, also to be connected as load resistors.

## Technical data:

|                           |                                    |
|---------------------------|------------------------------------|
| Description               | : high-performance cement resistor |
| Nominal value             | : 33 Ohm                           |
| Rated voltage             | : -                                |
| Power rating              | : 20 W                             |
| Frequency range           | : -                                |
| Housing                   | : -                                |
| Colour/colour coding      | : -                                |
| Enam. copper wire(CUL)    | : -                                |
| DC resistance             | : -                                |
| Saturation current(50 Hz) | : -                                |
| Primary                   | : -                                |
| Secondary                 | : -                                |
| Pin spacing               | : -                                |
| Packing unit              | : 1                                |
| Dimensions                | : -                                |
| Weight                    | : 22 g                             |
| Pos.                      | : -                                |
| Other features            | : -                                |
